AI ON THE SYSTEMS YOU ALREADY RUN

Your systems. Your data. *Intelligent action.*

DEIA AIX adds an **AI knowledge and intelligence layer** on top of the software, data sources and hardware you already run, **without big modifications**. Its AI models run **inside your own infrastructure**, so your data is never exposed to the outside world.

0 systems to rip out or replace

100% of AI models run inside your infrastructure

5 steps from signal to proven outcome

4 manufacturing applications, live today

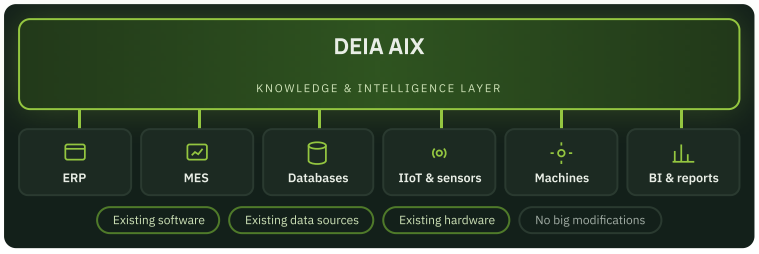

2 domains next: Finance and Healthcare

1 platform for every domain

BUILT ON WHAT YOU HAVE

An intelligence layer, not a replacement.

DEIA AIX works with the systems you already run and connects what they know.

PRIVATE AI

Your data stays inside.

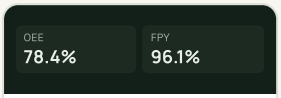

The AI runs where your data lives, so intelligence is built without exposing it.

OUR FOUNDATIONAL AI PHILOSOPHY

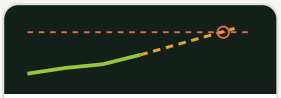

From signal to proven outcome.

BI senses. DEIA AIX adds the four steps that follow.

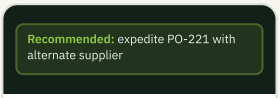

Sense

Measure what is happening now, with trusted, configurable KPIs.

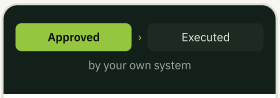

Predict

AI finds risks, anomalies and opportunities before they hit.

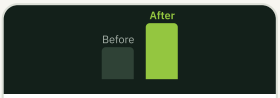

Recommend

The right action, with the evidence behind it.

Automate

Only where it is efficient, with people in control.

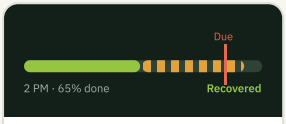

Monitor

Always. Outcomes are measured, so results are facts, not opinions.

MANUFACTURING FIRST

Intelligence applications, live today.

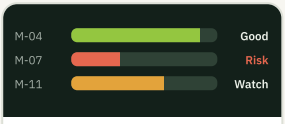

Each inherits the platform: private, configurable, governed.

LIVE

Production Command Center

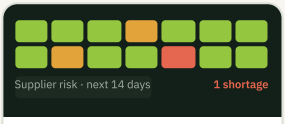

See orders at risk early, and recover them before they are late.

LIVE

Machine AIX

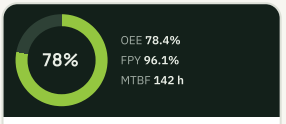

Machine data turned into predictive intelligence and intelligent action.

LIVE

Procurement Command Center

See supply risk early, decide with evidence, act in your ERP.

LIVE

Viz AIX

One trusted picture of the enterprise, with configurable KPIs.

Finance

Healthcare

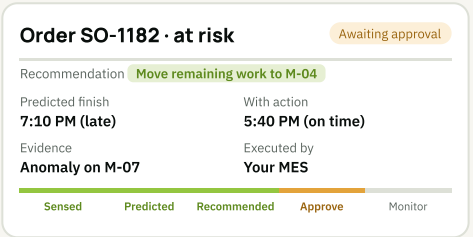

Coming next

New domains from the same platform, with the same private AI.

WHY AI, NOT ONLY EXPERIENCE

Knowledge that stays.

HUMAN KNOWLEDGE ALONE	WITH DEIA AIX
– Never complete	✓ Comprehensive, holistic
– Varies by person and shift	✓ Consistent every time
– Leaves when people leave	✓ Keeps learning, and stays

One decision, end to end: evidence first, people approve, your systems execute, and the outcome is measured. Sample data.

See it on your own systems.

Bring one problem: a late order, a failing machine or a supplier risk. We'll show DEIA AIX working on your data, inside your infrastructure.
